Research Interests

My primary research interest lies in the intersection of machine learning and natural language understanding. I am generally interested in understanding the implications from news sources, including their *perspectives* and *frames*. I am also interested in multi-modality learning, low resource/zero-shot NLP, NLP for social good, and other applications of NLP.

University of Pennsylvania

Fall 2021 – Present

*Advisor: Prof. Mark Yatskar**Project: Zero-shot Image Classification with Pre-trained Text Representations*

- *Pretrain language models on Wikipedia articles and produce text representations as side-information*
- *Align image and text representations for zero-shot image classification*

Boston University

Spring 2019 – Fall 2020

*Advisor: Prof. Derry Wijaya**Projects:*

- *Detect frames in news headlines and analyze news framing trends surrounding U.S. gun violence*
- *Capture and transform speaking styles in a low resource setting*
- *Create multimedia summaries using tweets and videos*

City University of Hong Kong

Aug 2019 - Sep 2019

*Advisor: Prof. Junhui Wang**Project: Analyze Chinese law documents and cluster similar case descriptions*
